LEARNING ENHANCEMENT PROGRAM

The Junior Secondary Learning Enhancement Program has been developed as a series of 5 week projects that support the delivery and engagement of literacy and numeracy in various real-life and contextual areas. The purpose of these projects is to create an opportunity for students to improve and apply their literacy and numeracy skills in an integrated context. Student will complete 8 projects each year (5 weeks each), ultimately improving their ability to apply literacy and numeracy skills in diverse contexts, preparing them for real life experiences.

We believe positive relationships flourish through our Junior Secondary Wellbeing structures. The Junior Secondary Student Services acts as a central point where student are able to access the Head of Year who is responsible for wellbeing, behaviour and positive learning experiences that support student resilience, diversity, success and embracing tradition.

Gay Collins  
Head of Year 7

Rachel Coull  
Head of Year 8

Matt Hass  
Head of Year 9
