POSITIVE BEHAVIOUR FOR LEARNING

What is Positive Behaviour for Learning (PBL)

At Gympie State High School we aim to support all teaching and learning through explicitly teaching appropriate behaviours and the use of positive strategies that encourage personal best. PBL is an evidence-based framework for establishing the social culture needed for schools to be effective learning environments for all students.

At Gympie State High School we have high expectations of all students to be:

Respectful, Responsible, Safe, Learners

PBL is not a program and therefore does not compete with existing Social and Emotional Learning Programs. It is an organisational framework for identifying, adopting and applying evidence based practices for building and supporting academic and social success for all students.

New students are explicitly taught these behaviour expectations as part of their transition to high school.

At Gympie State High School we are:

★ Respectful ★ Safe
★ Responsible ★ Learners

‘Gold from the school as well as the mines...’
