WELLBEING

We believe positive relationships flourish through our Junior Secondary Wellbeing structures. The Junior Secondary Student Services acts as a central point where students are able to access the Head of Year who is responsible for wellbeing, behaviour and positive learning experiences that support student resilience, diversity, success and embracing tradition.

Junior Secondary Student Services facilitate all year level communication between support structures including the Head of Year, Junior Secondary (Head of Department) and Deputy Principal. We encourage strong teacher-student-parent relationships, school spirit and distinct identity which enable a stronger, more positive focus on behaviour management, attendance and achievement. The mini schools of Fisher, Hanger and Tozer also serve as the house system of the school with the LPP (Learning Partnerships Program) and senior schooling making up the remaining mini-schools (community structure).
